

**Clima-South: Support for Climate Change Mitigation and Adaptation
in the EU Southern Neighboring countries**

مشروع كليماساوث: دعم دول جوار الإتحاد الأوروبي الجنوبية في مجال التكيف مع
والتخفيف من ظاهرة التغير المناخي.

2013

تاريخ بداية المشروع:

2016

التاريخ المتوقع لنهاية المشروع:

الاتحاد الأوروبي.

الممول:

Agri Consulting

المنفذ:

8 دول عربية وإسرائيل (سوريا لم تنضم للمشروع بسبب الظروف السياسية الحالية)

الشركاء في المشروع:

5 مليون يورو.

كلفة المشروع:

مساعدة دول الجنوب ورفع القدرات فيما يخص التكيف مع تغير المناخ والتخفيف من
الانبعاثات وفيما يخص الانتقال الى التنمية منخفضة الكربون/ الانبعاثات.

الهدف العام:

1. to support the transition of 10 ENPI Mediterranean Countries
towards low carbon
2. development and climate resilience, by enhancing
appropriate action through capacity development

1. Strengthening the capacity of policy makers to engage in and to implement the upcoming global legal climate change framework post-2012, as well as the Kyoto Protocol and/or its potential successor;
2. Strengthening the institutional capacity for strategic planning on climate change mitigation, including Monitoring Reporting and Verification (MRV), Low Emissions Development Strategies (LEDs), and Nationally Appropriate Mitigation Actions (NAMA) (where not covered by other donors and projects);
3. Strengthening the institutional capacity for strategic planning on climate change adaptation, in particular improving the use and sharing of data on climate science and economic development trends in a way that can enhance the capacity of beneficiary countries to elaborate well targeted adaptation strategies, further increase climate resilience, and mainstream climate change adaptation into other policies;
4. Improving partner countries capacities to benefit from possible new or reviewed financing mechanisms;
5. Promoting a closer dialogue with the EU on climate change, better access to information and expertise on the EU climate policies and *acquis*. Promote north-south as

well south-south cooperation on climate change issues, and support the coordination of the on-going climate change actions in the region.
